DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U. S.C. 102(e) that form the basis for the rejections under this section made in this Office action:

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-22 are rejected under 35 U.S.C. 102(e) as being anticipated by TCP/IP

Illustrated Volume 1 The Protocols written by W. Richard Stevens.

3. Regarding claims 1-4, 7, 11-18, 21-22, Stevens teaches sequence, packet numbers, and tracking packets, page 226, lines 10-40. Stevens teaches a timeout period to retransmit missing packets, page 297, lines 1-8. Thus, the above claim limitations are obvious in view of the combination.
4. Regarding claims 5-6, Stevens teaches stopping receipts upon detection of a packet, page 309, lines 33-40. Thus, the above claim limitations are obvious in view of the combination.
5. Regarding claims 8-10, 19-20, Stevens teaches buffer sizing, page 282, lines 23-29. Thus, the above claim limitations are obvious in view of the combination.

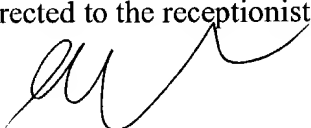

Conclusion

1. Prior art made of record and not relied upon is considered pertinent to applicant's

disclosure is disclosed in the Notice of References Cited. A close review of the references is suggested. The other references cited teach numerous other ways to retransmit missing packets, thus a close review of them is suggested.
